Bag Filler

THE SOLUTION FOR FILLING YOUR BAGS

Bag Filler

THE SOLUTION FOR FILLING YOUR BAGS

Our bag filling plants enable you to outsource filling services on calibrated scales from storage silos or Big Bags/octabins.

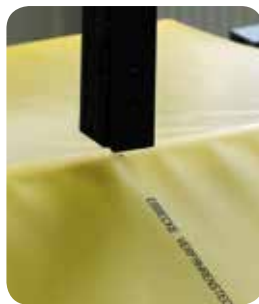

We fill using semi-automatic machines into valve bags and open bags and in this way offer you short-term usable and flexible filling capacities as a replacement for or an extension of your own filling plants.

Technical data

- › **Bag types:** valve bags, open bags, paper and plastic bags
- › **Bag closure:** plastic bags – welded, paper bags – sewn, valve bags – welded with valve
- › **Product-contacting parts:** in stainless steel, electropolished
- › **Charging:** from 100 m³ silos, or as an alternative from Big Bags or octabins
- › **Number of filling lines:** 3
- › **Filling plants:** Dosing auger scales
Turbine packers, Packer with compressed air,
Vacuum packer, Downpipe packer
