# Logistics management

## THE SUPPLEMENT TO PRODUCTION

Our supplementary logistics services enable you to out-source not only complex production but also subsequent processes.

These consist of the palletising, labelling, packing and storage of your finished products in our warehouses. In this way, you can always deliver to your customers without needing to re-deliver to your works.

If required, we can also supply appropriate exchange containers such as foldable and stackable all-metal boxes. Additional services are the dispatch management, the sample dispatch and the drawing up of export confirmations.

### Technical data

- › **Storage containers:** Big Bags, octabins, bagged goods, metal boxes, barrels, fibre-glass drums
- › **Storage place:** 6,000 pallets, flexibly expandable
- › **Type of storage:** closed and heated warehouses

### Application examples

- › Storage of Big Bags after filling from our silos or from bags
- › Storage of palletted bagged goods
- › Storage of barrel and drum containers
- › Storage of produced goods and dispatch management for export
- › Sample dispatch / filling of small containers
- › Dispatch of single bags from palletted goods
- › Composition of deliveries from various stocks
