THE SOLUTION FOR THE MANUFACTURE OF PLASTIC POWDERS

*Turn coarse into fine –
milling of granulates,
shaped pieces and
continuous fibers*

Plastic Mill

THE SOLUTION FOR THE MANUFACTURE OF PLASTIC POWDERS

Our fine milling plants for plastic granulates enable you to mill the widest variety of plastic granulates to the finest degree of milling. All of the plants are equipped with dosing devices and appropriate separators with filters. The products can be filled into containers according to the customer's requests.

Technical data

- › **Target fineness:** 35 – 1,500 µm
- › **Plant types:** disc mill, pin mill, planetary mono mill, cryogenic mill
- › **Container:** bagged goods, Big Bags, octabins or barrels
- › Feeding from silo is possible
- › Filling of silo vehicles is possible

Application examples

- › Fine milling of LDPE (Low Density Polyethylene)
- › Fine milling of polypropylene
- › Fine milling of polystyrene
- › Fine milling of polyamide
- › Fine milling whilst at the same time de-dusting the finished product
- › Fine milling of EVA (Ethylene-vinyl acetate) under cryogenic conditions
